The Vanier Institute of the Family recognizes and honours Indigenous families in Canada, which have sustained rich and vibrant Nations across this land since time immemorial. As we engage in conversation with Indigenous communities to build a foundation of data to support evidence-based decision making, we recognize that the realities and experiences of Indigenous people – including First Nations, Métis and Inuit families – are highly diverse and, as such, the statistics and information below are presented by specific group wherever possible.

The language surrounding identity and Indigenous people is evolving, and we have attempted to identify and use current terminology while also recognizing that there is always diversity regarding people’s preferences. As we continue the conversation, we welcome any feedback you may have, which can be sent to publications@vanierinstitute.ca.

### Indigenous Families in Canada

<table>
<thead>
<tr>
<th>Stat</th>
<th>Description</th>
<th>Details</th>

<tbody>
<tr>
<td><strong>1.7M</strong></td>
<td>Total population of First Nations people, Métis and Inuit in Canada in 2016, accounting for 4.9% of the total population.</td>
<td>The total Indigenous population grew by approximately 43% since 2006 (vs. 9.6% among the non-Indigenous population), and is projected reach 2.0 million to 2.6 million by 2036.</td>
</tr>
<tr>
<td><strong>977,000</strong></td>
<td>Number of people in Canada reporting First Nations identity in 2016 (44% of whom live on a reserve), up by 40% since 2006. First Nations people accounted for 58% of the total Indigenous population in 2016, and the First Nations population is projected to reach as many as 1.7 million by 2036.</td>
<td></td>
</tr>
<tr>
<td><strong>588,000</strong></td>
<td>Number of people in Canada reporting Métis identity in 2016, up by 51% from 2006. People reporting Métis identity accounted for 35% of the total Indigenous population in 2016, and the Métis population is projected to reach as many as 835,000 by 2036.</td>
<td></td>
</tr>
<tr>
<td><strong>65,000</strong></td>
<td>Number of people in Canada reporting Inuit identity in 2016, up by 29% from 2006 – nearly three-quarters (73%) of whom lived in Inuit Nunangat. People reporting Inuit identity accounted for 3.9% of the total Indigenous population in 2016, and the Inuit population is projected to reach as many as 95,000 by 2036.</td>
<td></td>
</tr>
<tr>
<td><strong>30.6, 34.7 and 27.7</strong></td>
<td>Average age of First Nations people, Métis and Inuit in Canada in 2016, respectively (vs. 40.9 years among the non-Indigenous population).</td>
<td></td>
</tr>
<tr>
<td><strong>29%, 22% and 33%</strong></td>
<td>Proportion of First Nations people, Métis and Inuit in Canada, respectively, who were aged 14 and under in 2016, totalling approximately 449,000 children (vs. 16% among the non-Indigenous population).</td>
<td></td>
</tr>
</tbody>
</table>
6%, 9% and 5% Proportion of First Nations people, Métis and Inuit in Canada, respectively, who were seniors in 2016, totalling approximately 116,000 (vs. 16% among the non-Indigenous population).14

39%, 26% and 27% Proportion of First Nations, Métis and Inuit children aged 4 and under, respectively, who lived in a lone-parent family in 2016 (vs. 13% among the non-Indigenous population).15

21%, 11% and 23% Proportion of First Nations, Métis and Inuit children aged 4 and under, respectively, who lived with at least one grandparent in 2016 (vs. 10% among the non-Indigenous population).16

2.2%, 0.9% and 1.2% Proportion of First Nations, Métis and Inuit children aged 4 and under, respectively, who lived in a “skip-generation” household, that is, living with their grandparents without their parents present, in 2016 (vs. 0.3% among the non-Indigenous population).17

23%, 9% and 41% Proportion of First Nations people, Métis and Inuit, respectively, who lived in crowded housing18 in 2016 (vs. 9% among the non-Indigenous population).19

24%, 11% and 26% Proportion of First Nations people, Métis and Inuit, respectively, who lived in a dwelling in need of major repairs (vs. 6% among the non-Indigenous population).20

51% Proportion of foster children in Canada aged 4 and under in 2016 who were Indigenous (approximately 4,300 total), up slightly from 49% in 2011. Indigenous children represent only 7.7% of all children in this age group.21

26%, 17% and 67% Proportion of First Nations, Métis and Inuit children, respectively, who report that their child care arrangement promotes traditional and cultural values and customs. Participation in traditional activities has been positively associated with pro-social behaviours among children.22

---

3 According to Statistics Canada, the two main contributing factors behind the growth of the Indigenous population: natural growth (life expectancy and relatively high fertility rates) and changes in self-reported identification (“Put simply,” says a 2016 Census report, “more people are newly identifying as Aboriginal on the census – a continuation of a trend over time”). Link: http://bit.ly/2xma99V.

5 First Nations people include those who are registered or treaty Indians under the Indian Act; that is, Registered Indians (76% of the total First Nations population) – as well as non-status Indians (24%).
